

Your **AI Governance** Co-pilot — Govern AI from Day One

Adeptiv AI is an enterprise AI Governance platform that automatically discovers AI inventory, automates compliance, manages AI risks, and continuously monitors model behavior — ensuring every AI system you deploy remains trusted, safe, and audit-ready.

[Book a 20-minute demo](#)

The Problem — why AI governance matters the most now

If your team can't manage AI inventory lifecycle, global AI complinace, evolving AI risks, or produce audit-ready reports on demand, you're vulnerable.

Shadow AI & unknown models

Unapproved tools, undocumented datasets and hidden pipelines produce compliance blind spots.

Manual audits & fractured evidence

Time-consuming spreadsheets and siloed reports delay launches and increase audit costs.

Regulatory exposure

EU AI Act, ISO/IEC 42001, state AI laws (e.g., Colorado) and sector rules demand traceability and safety controls .

Trust erosion

Bias, opaque decisions and unexplainable outcomes undermine user and customer trust.

What Adeptiv AI does

WE OPERATIONALIZE AI GOVERNANCE

Adeptiv AI is your enterprise AI Governance Co-Pilot — automating the entire governance lifecycle so AI stays safe, compliant, and trustworthy.

Our AI-powered platform discovers AI systems, auto-maps 30+ global regulations, generates and manages AI-specific risks, evaluates model behavior in real time, produces audit-ready compliance, and much more.

Calculate potential ROI

AI Discovery & Inventory Management

Auto-discover models, datasets and pipelines; build a searchable AI catalog

Risk Scoring & Impact Assessments

Contextual risk scoring for high-impact systems with guided mitigation actions

Fairness & Bias Testing

Automated cohort-based metrics with recommended remediation steps

Explainability & Model Cards

Auto-generated model cards with data lineage, limitations and SHAP/LIME explanations

Compliance Mapping

One-click mapping to 28+ AI regulations including EU AI Act, ISO 42001, NIST RMF and common sector laws

Policy Automation & Approvals

Role-based workflows, sign-offs, and human-review gates

Continuous Monitoring & Alerts

Drift detection, bias monitoring, and compliance posture dashboards

Audit-Ready Reporting

Export evidence packs, generate regulator-ready reports and maintain immutable logs

Integrations & APIs

Plug into Snowflake, Databricks, MLflow, GitHub, S3, Okta and enterprise SIEMs

How It Works —

Governance across the AI lifecycle

30+ Compliance & Standards mapping

DESIGNED TO ALIGN WITH REAL REGULATIONS AND STANDARDS

Adeptiv AI ships with pre-built 30+ global standard templates and controls to quickly map with your AI use cases.

Download the EU AI Act: Field-Ready Mapping Template

EU AI Act

Impact assessments, conformity artifacts and transparency requirements

ISO/IEC 42001

AI management system controls and traceability

NIST AI RMF

Risk management & governance processes

Sector laws & state acts

Including Colorado AI Act and other jurisdictional guidance

Business impact & ROI

GOVERNANCE AS A VALUE DRIVER

With Adeptiv AI, enterprises innovate with confidence — knowing every AI system launched is accountable, transparent, and aligned with global Responsible AI standards.

Calculate potential ROI

Reduce audit effort with automated evidence packs

Lower cost of compliance with reusable templates & workflows

Improve brand trust and customer confidence

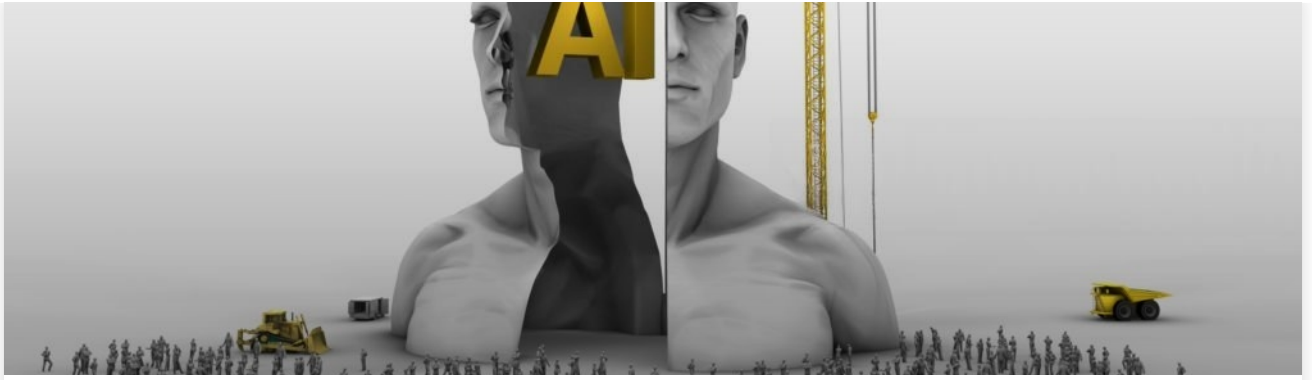

Faster time to market by removing governance bottlenecks
